

Tips total to the end of December 2017: ~\$6335.01

On November 2nd 2017, DSP set up Nightbot to show tips in chat.

[12:34] <darksydephil> btw there should be two changes today, we'll see

[12:34] <darksydephil> first change is, if someone tips me, it now says that in the stream chat along with their message

[12:34] <darksydephil> it ties in with nightbot to do that

This worked right away, with sub \$2 tips that wouldn't get on-screen notifications showing up:

[13:09] <nightbot> nich2440 just tipped \$1.00

But unfortunately messages with those tips did not get displayed. DSP did read out a message for at least 1 of nich2440's \$1 tips, and the on screen notification for this \$2 tip had a message:

[13:18] <nightbot> WaifuDestroyerMatt just tipped \$2.00

It is unclear yet if Nightbot will show tips when DSP is offstream, that will only be cleared up if it displays one or if DSP confirms an offstream tip which Nightbot did not show.

20171113 [12:21] <nightbot> ratchefan12 just tipped \$3.00

This was well before the stream went live, so apparently Nightbot will show tips in chat when DSP is offstream.

DSP also noted the tip was "right before the stream started" at ~12:15 into the November 13th's prestream.

During December 1st 2017 Nightbot stopped displaying tips, it showed the only visible one I could find on the Horizon Zero Dawn videos and it showed a \$1 tip during the NfS Payback prestream that DSP gave a shoutout for... then nothing.

I only spotted this while checking the prestream for talk about the Live Pet, there was a clear \$2 tip which Nightbot did not mention, and more to come.

As such I will continue doing image scanning, but will incorporate those into this text document with guesstimated times as possible.

Also this means I can include the messages. When a 'swearword' like fuck is used, it's censored like @%#! and if I can guess which 'swearword' was used I will just replace it.
